

Enrico Talamas is a non-tenured assistant professor of Condensed Matter Physics at the Department of Sciences of Roma Tre University since 2023.

He graduated in Engineering Physics from Politecnico di Milano in 2017 and obtained his Ph.D. in Physics in 2021 from the same institution. In 2021 he joined the Physics and Technology of Semiconductors group at the Department of Sciences of Roma Tre University as a Postdoc.

His main research interests are the epitaxial growth and the structural characterization of SiGe heterostructures for optoelectronic applications.

He is co-author of 14 scientific publications in international journals.
