

Synthetic Résumé

I am Associate Professor at the Department of Business Studies, Roma Tre University, Rome, Italy. I received my M.Sc. degree in Electrical Engineering and my Ph.D. degree in System Engineering from Sapienza, University of Rome, Italy.

My research interests lie in the area of nonlinear programming, with an emphasis on multi-agent contexts. I enjoy studying theoretical properties and designing algorithms, relying on tools from nonsmooth and variational analysis, and focusing especially on problems arising from applications in finance, economics and networking.
